Re: Vaccine Clinic/Testing Results remain negative

Dear Meadows' Family and Friends,

The COVID-19 vaccine is in New York. We are fortunate to be listed as priority and our residents and staff are first to receive the vaccine.

We have partnered with CVS pharmacy and will have an on-site clinic scheduled for DECEMBER 26th, Saturday.

Our residents and no less than 1/3 of our staff are to be scheduled for the first dose.

There are many questions and we understand. We will provide you with as much information that is available to us.

This link has some of the most current information <https://www.cdc.gov/vaccines/covid-19/health-systems-communication-toolkit.html#posters>.

A member of the Brookmeade team **will contact families** to further discuss the details of the vaccine and obtain consent.

The second clinic at this time is scheduled for January 16th. All residents and staff that took the first dose must take the booster of the vaccine in order for it to be effective.

We will contact you and we will provide you with more specifics as we get them.

Also, the resident and staff tests conducted last week are returning and thus far remain NEGATIVE. We conducted further resident testing today and as always will update you as these results come in.

Contact us directly for any specific questions you may have especially related to your loved one. Please know that for your privacy and that of your loved one we will not respond on a public forum.

Thank you for your support and as more is to come we will update you.

Stay well,

A handwritten signature in black ink that reads "Karen Zobel".
